

If the the FCC vote for more consolidation is not already rigged, please stop it immediately, as it would further nudge out the general public from access to the already privitized airwaves. Remember, the airwaves have traditionally supposed to ultimately belong to the public, but now they're controlled mainly by eight monolithic media conglomerates, (Fox, Viacom, Disney, GE/NBC, AOL Time Warner, Clear Channel Radio, New York Times, and Washington Post) and this FCC vote could mean one stop toward fascism, as big economy renders the people's voice irrelevant. We know that these media conglomerates have made huge campaign contributions (which I call "legalized bribes") to the Bush campaign, so the vote has already been bought, which means there may be nothing you can do to change this. Thank you if you take my opinion into account. Also please let me know why the proposed changes have been kept so secret, that makes it look even more suspicious.
